Technology that works for you

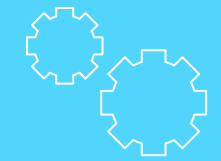

REDUCE COSTS AND OPTIMIZED OPERATING TIMES

Ineffective or idle equipment has a negative impact on your company profits.

We offer onsite repairs and maintenance solutions, as well as tips and training to optimize the use of ProKASRO products. We provide rental equipment, for specialised jobs or as temporary replacements during equipment repairs. This will result in the lowest downtime for your equipment!

We will draw up a maintenance schedule to ensure a cost effective way to keep your equipment in perfect condition.

By integrating the maintenance schedule in your work schedule, your operators, engineers, planners and customers get a much clearer picture. Your product becomes more reliable and your customers believe you can execute the job successfully.

TECHNICAL TRAINING

We provide technical training for the optimal use and maintenance of your ProKASRO product. We teach users to anticipate on problems or defects to prevent serious damage to your equipment.

optimal solutions for your business needs

ONE STOP SUPPLIER FOR PARTS AND PRODUCTS

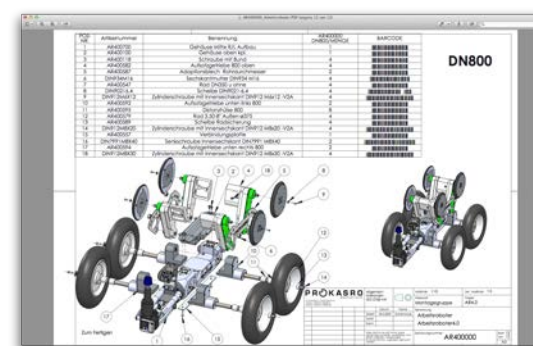

TAILORED SOLUTIONS

We design, fabricate, and produce (customize) products on a wide scale for sewer/ pipeline rehabilitation, repairs and business needs. It is our priority to optimize the use of ProKASRO products and to investigate the best solutions to collaborate with other systems.

- Custom vehicle preparation.
- Brackets and holders for special tools.
- Device adaptations for specialised jobs.
- Replacing or upgrading to newest standards.
- Customized tools.

SPECIALISED PRODUCTS

We deliver a range of specialised parts and products. All our products come with a full manufacturer warranty. We also provide the necessary maintenance and additional/ replacement parts for our product line.

All parts are labeled with a unique stock number. That stock number can easily be found on the (online) provided explosion drawings, which makes it very clear for engineers and operators to order them from our stock.

THE COMPLETE PACKAGE.

For every problem, we guarantee a solution. We provide the complete package, whether you are struggling with a failing ProKASRO cutter or UV unit which broke down. We can repair almost every device in and on your truck or unit. The electrical systems, compressors or generators provided with your vehicle can be serviced and repaired. Please contact us for assistance with the necessary parts.

- All ProKASRO parts.
- Consumables, Cutting tools, Drills etc.
- Electrical parts, Lights, Lamps, Cable etc.
- Air tools and parts, Flex, Saw, Drill.
- Pipe test and measure equipment.
- Vehicle signalization lights and parts.
- Power supplies, Compressors, Hydraulics.

OPERATIONAL TIPS

We provide ideas to optimize the use of your ProKASRO product. We can show your operators which tool and materials are best suited for the job, and inform them about usage and maintenance. We want to make the job easier and more efficient.

OPERATOR TRAINING

The real field work. We provide answers to questions such as; how do I read drawings? Where do I place my truck to start the job? We teach operators to optimize tasks by making the best use of workspace and time. Ultimately we hope to reduce stress and keep their love for the job alive.
